

## Tyee Cove Dive Site

This site is one of the best and most versatile shore dives sites in the Greater Nanaimo / Nanoose Bay area. Accessible in almost any condition of wind or tide, this is the "go to site" when all others are inaccessible.

The site is located just one half hour north of Nanaimo, BC.

Just follow Hwy 19 to north to Northwest Bay Road and then follow this winding road for a few kilometers and turn right at Stewart Road.

Stay on this road and it naturally turns into Dolphin Drive, continue on and watch for Blueback Drive on your left (water side) and turn here.

Follow Blueback Drive to the intersection with Tyee crescent and park past the mail boxes. A short trail leads to the beach.

From the entry point go straight away from the beach, (north) and when you come to the eel grass you will find a natural chute that takes you down and in between rock formations on either side of you. At the 60ft. range go either left or right and explore as you will!

Dive safe, cheers!
